RECRUITMENT INFORMATION

Position: Research Assistant  
Quantity: 2

Are you a self-motivated person? Are you interested in becoming a Data Scientist? Are you looking for a place not just to work but also to explore your own personality & improve your skills? And do you want your hard work and contribution to be always noticed and appreciated? If your answer is ‘Yes’, you need to contact us now!

RTA was established with the drive to bring survey and analytics technology to the next level and to integrate the technology into business and development research. We aim to change the world by bringing Big Analytics into Process Management and Survey Data Collection and Analytics.

We know we can only accomplish that mission with a team of A players.

Your duties in RTA: Joining in RTA, you are expected to:

- Become an A player
- Design survey and research work
- Analyze data using Stata & R
- Write project reports and develop business and research proposals
- Develop documentations for Company’s products
- Assist or taking charge of project management

In order to get the job you need to have:

- Bachelor or Master degree in social studies, economics, statistics, econometrics or related fields (we welcome both fresh and experienced graduates)
- Command English and computer ability (French is a plus)
- Quantitative and/or qualitative background and having completed coursework in economics, mathematics or statistics – optional.

What you will get:

- A chance to work side by side with highly energetic teams fighting for the same goals
- Highly competitive salary based on candidate’s expertise, frequent salary review
- Clear career path
- Performance-based bonuses in addition to 13th-month salary
- Good health care and insurance programs
- And more

Please send your résumé (CV) and a cover letter to careers@rta.vn as a way to give yourself a chance in this new field and build your own dream.

Closing date: As soon as the position is filled up
